Biogaspellets

Biogaspellets consists of a constant mix of different plant-based products, pressed into a pellet. The advantage of a pellet is that it can be used and digested to the maximum in a short period of time. The products come from the grain and seed processing industry and are ground and pelleted. This process opens up the material and makes it quickly available for micro-organisms in the biogas installation.

Valid from 28 July 2022

Downloaded on 19 November 2026

DM	85.0
Ash	7
Phosphor (P)	5.0
Nitrogen (N)	15
Potassium (K)	12.0

Biogas yield	530
Methane %	61
Digestion Speed	8.0

Levels are based on averages and stated in grams per kg of dry matter, unless stated otherwise. Changes in product composition are reserved.

Logistics & Storage

Transport	Bulk with walking floor, tipper or container truck
Storage	Bunker or silage
