Flushing water

Flushing water is obtained when barn air is purified with either a biological or a chemical air washer. This air washer removes ammonia, fine particulates and odors from the air, the sludge water is collected and can be used as an alternative fertilizer.

Valid from 28 July 2022

Downloaded on 19 November 2026

Phosphor (P)	40.0
Nitrogen (N)	1

Levels are based on averages and stated in grams per kg of dry matter, unless stated otherwise. Changes in product composition are reserved.

Logistics & Storage

Transport	Liquid with tank truck
Storage	Silo
