Renewables

Iron Oxide

Iron Oxide for Renewables is widely used as a desulphuriser in biogas plants. The co-product has a high affinity for sulphur compounds and can effectively remove them from the biogas. Iron oxide is usually used in the form of slurry, pellets or granules and can be used in a range of desulphurisation systems.

Valid from 08 June 2023

Downloaded on 05 September 2026

DM	88.0

Levels are based on averages and stated in grams per kg of dry matter, unless stated otherwise. Changes in product composition are reserved.

Logistics & Storage

Transport	Unloaded with walking floor, tipper of container truck
Storage	Bunker
